Комплексное решение для научных исследований

Доступ к

- Электронным журналам
- Электронным книгам
- Электронным архивам
- Агрегированным базам данных

Все это дополняется мощной системой EBSCO Discovery для удовлетворения информационных потребностей пользователей

EBSCO делает уникальные вещи:

- Помогает библиотекам бороться с «Google» за внимание пользователей
- EBSCO (и библиотеки) обладают двумя общими вещами, которых нет в “Google”:
 - огромными коллекциями книг, журналов и т.д., которые недоступны в открытом доступе в интернете
 - предметными указателями, практически по любой тематике

EBSCO Shows Major Commitment to Library Workflows

~ EBSCO Acquires YBP Library Services and its GOBI platform from Baker & Taylor, Inc. ~

IPSWICH, Mass./CONTOOCOOK, N.H. — February 20, 2015 — EBSCO Information Services (EBSCO) is announcing a significant investment in the library workflow with the acquisition of YBP Library Services (YBP) from Baker & Taylor.

Founded in 1971, YBP Library Services has proudly served as the leader in delivering academic library workflow and “shelf ready” solutions through its innovative suite of acquisition and metadata resources. GOBI3 (Global Online Bibliographic Information) serves as YBP’s primary tool for the discovery and acquisition of digital and print monographic content. Relied upon by academic, research and special libraries worldwide, GOBI provides access to more than 12 million titles, including more than one million digital titles from leading aggregators and publishers.

EBSCO has been providing collection development and acquisition services for print and electronic journals (e-journals) for more than 60 years. EBSCO is the largest provider of these services to libraries worldwide.

Senior Vice President, YBP Sales & Operations, Mark Kendall, believes EBSCO is the perfect landing place for YBP because of its strong commitment to libraries. “EBSCO fully understands the value that YBP and our outstanding staff bring to libraries and is committed to supporting this while also helping expand our core services through investment in new technologies. They have a leading edge vision for integrating collection development and acquisition services for all formats of content, including monographs and journals, with their discovery solution. This commitment will add significant value to both libraries and end

“YBP is recognized in the market as the leader at what they do. We want them to keep doing it. We are in a position to help their progress and expedite their vision, and we are looking to continue their operations and partnerships with publisher and aggregator platforms.”

Title: ENCYCLOPEDIA OF AGING
Author:
Publish Year: 2006 **ISBN:** 9780826148438 **US List Price:** 395.00 USD

This is the fourth edition of an encyclopedia of aging, edited by four persons, with hundreds of contributing authors. The last edition was published in 2001. It aims to present the cutting edge of geriatrics and gerontology over a wide swath of topics. This is a worthy objective and, indeed, a large number of topics are addressed. This encyclopedia aims at a wide audience, ranging from lay persons to policy makers, scientists, social scientists, and healthcare providers. Some of the entries give an introduction to the topic in general and then conclude with a discussion of how aging affects the situation. Some entries are more bibliographic essays, whose references, measured by column inches, are on a par with the text itself. There is an excellent index which makes finding specific information a snap. There is an uneven quality to the entries. Some launch into topics of molecular biology assuming an understanding of reactions that methylate. Some serve as very good introductions to an area. The social sciences regarding aging are particularly well covered. This book reveals the enormous breadth of contemporary views of gerontology, going, as one colleague put it, ""from cells to Congress." 65/100. David O. Staats, MD(University of Oklahoma Health Sciences Center)
