CONTENTS

FOREWORD xiii

ACKNOWLEDGEMENTS ..... xix–xvi

INTRODUCTION 1

Aims of this book 1

Conceptions and misconceptions about cancer 2

The identification of causative agents 4

The evolution of therapy 7

Cancer policy and priorities 8

References 9

PART I. THE OCCURRENCE OF CANCER

Chapter 1. Measuring the burden of cancer 15

Measurement 15

The burden of cancer in the world 22

References 29

Chapter 2. Objectives and methods of descriptive epidemiology 31

The geography of cancer 31

Variation in risk for cancer related to 'personal' factors 36

Trends of cancer with time 43

Studies of migrants 46

References 50

Chapter 3. Descriptive epidemiology of cancers at specific sites 52

Cancer of the lip 52

Cancers of the tongue and mouth 53

Cancer of the salivary glands 53

Cancer of the nasopharynx 53

Cancers of the oropharynx and hypopharynx 54

Cancer of the oesophagus 55

Cancer of the stomach 56
Cancer of the colon 57
Cancer of the rectum 58
Cancer of the liver 59
Cancer of the pancreas 59
Cancer of the larynx 61
Cancer of the lung 61
Mesothelioma 64
Cancers of the bone 65
Soft-tissue sarcomas 66
Malignant melanoma of the skin 67
Other cancers of the skin 68
Cancer of the breast 69
Cancer of the uterine cervix 72
Choriocarcinoma 73
Cancer of the corpus uteri 73
Cancer of the ovary 74
Cancer of the prostate 74
Cancer of the testis 76
Cancer of the penis 76
Cancer of the urinary bladder 78
Cancer of the kidney 78
Tumours of the eye 79
Cancers of the nervous system 79
Cancer of the thyroid 81
Hodgkin's disease 81
Non-Hodgkin's lymphoma 82
Multiple myeloma 83
Leukaemia 84
References 88

PART II. THE CAUSES OF CANCER

Chapter 4. Defining cause 97
Concepts of causality 97
Identification of the causes of cancer 102
Environmental determinants of cancer 117
References 121

Chapter 5. Single environmental agents 126
Acrylonitrile 126
Aflatoxins 126
Alkene oxides 127
Alkyl esters, lactones and sultones 127
Alkyl halides 128
Aromatic amines 129
Benzene 130
Fibres and crystals 131
Fluorides used in drinking-water 132
Formaldehyde 132
Metals 132
Mustard gas 134
N-Nitroso compounds 134
Polyhalogenated aromatic and alicyclic compounds 135
Tris(2,3-dibromopropyl)phosphate 136
Polycyclic aromatic hydrocarbons 136
References 137

Chapter 6. Complex exposures 141
Mixtures containing polycyclic aromatic hydrocarbons 141
Aluminium production 142
Destructive distillation of coal 142
Iron and steel founding 142
Engine exhausts 142

Petroleum refining 143
Boot and shoe manufacture and repair 143
Furniture and cabinet making 143
Manufacture of isopropyl alcohol 144
Mining 144
Painting 144
Rubber industry 145
Textile manufacture 145
Welding 146
References 146

Chapter 7. Drugs and exogenous sex hormones 148
Antineoplastic agents 148
Other drugs 150
Exogenous hormones 151
References 153

Chapter 8. Radiation 155
Ionizing radiation 155
Ultra-violet radiation 161
Electromagnetic fields 164
References 164

Chapter 9. Tobacco 169
Lung cancer and cigarette smoking 169
Cancers in other organs 170
Forms of tobacco smoking 173
Role of age at start, duration and cessation of smoking 173
Role of gender 174
Role of cigarette composition 174
Interaction with other exposures 175
Passive exposure to environmental tobacco smoke 177
Tobacco chewing and snuffing 177

Betel-quid and areca-nut chewing 177
References 178

Chapter 10. Alcohol drinking 181
Cancers of the oral cavity and pharynx 181
Cancer of the larynx 181
Cancer of the oesophagus 182
Primary liver cancer 182
Cancers at other sites 183
Reference 183

Chapter 11. Viruses and other biological agents 184
Viruses 184
Hepatitis B virus 185
Herpes simplex virus-type 2 187
Human papilloma virus 188
Epstein-Barr virus 189
Human T-lymphotropic virus-type 1 191
Human immunodeficiency viruses 192
Other viruses 192
Parasitic diseases 193
References 195

Chapter 12. Diet 201
Methodological issues in studies of diet and cancer 201
Dietary assessment methods 202
Dietary factors that may increase the risk for cancer 203
Dietary factors that may reduce the risk for cancer 215
References 219

Chapter 13. Pollution 229
Air pollution 229
Water pollution 233
References 236

Chapter 14. Endogenous hormones, reproductive factors and sexual behaviour 240
Cancer of the breast 240
Cancer of the uterine cervix 243
Cancer of the endometrium 244
Cancer of the ovary 245
Cancer of the colon 245
Cancer of the prostate 246
Cancer of the testis 246
Cancer of the penis 246
References 247

Chapter 15. Psychological factors 251
References 252

Chapter 16. Socioeconomic factors 254
Differentials of cancer incidence and mortality 254
Record–linkage studies 256
Differences in survival from cancer 256
Reasons for differences in cancer frequency by social class 256
References 260

PART III. EARLY DETECTION OF CANCER

Chapter 17. Description of screening measures 265
Introduction 265
Benefits and costs of a screening programme 266
Evaluation of screening 266
References 268

Chapter 18. Effects of population screening measures 270
Cancer of the oral cavity 270
Cancer of the nasopharynx 270
Cancer of the stomach 270
Cancers of the colon and rectum 271

Cancer of the liver 272
Cancer of the lung 272
Melanoma 272
Cancer of the breast 273
Cancer of the uterine cervix 276
Cancer of the endometrium 279
Cancer of the prostate 279
Cancer of the ovary 279
Cancer of the urinary bladder 279
Cancer of the thyroid 280
References 280

PART IV. THE CONTROL OF CANCER THROUGH PREVENTION AND EARLY DETECTION

Chapter 19. Quantification of effect 287
Quantification of strategies for primary prevention 287
Quantification of the effects of strategies for early detection 292
References 293

Chapter 20. Site–by–site quantification of the effects of preventive measures 294
Cancer of the oral cavity 294
Cancer of the nasopharynx 296
Cancer of the oesophagus 296
Cancer of the stomach 298
Cancers of the colon and rectum 298
Cancer of the liver 300
Cancer of the pancreas 302
Cancer of the larynx 302
Cancer of the lung 303
Malignant melanoma of the skin 309
Other cancers of the skin 310

Cancer of the breast 311
Cancer of the uterine cervix 313
Cancer of the endometrium 315
Cancer of the ovary 317
Cancer of the prostate 317
Cancer of the urinary bladder 317
Cancer of the kidney 320
Leukaemia and lymphoma 320
References 321

CONCLUSION 329

Appendix: Age-standardized incidence rates per 100 000 for selected registries by site (with ICD-9 code) and sex 335
Subject Index 345
