

CONTENTS

Biology Session

The Development of Hepatomas of Different Growth Rate; with Comments on their Biology and Biochemistry

Harold P. Morris 1

Pathological Studies on Hepatoma of Rats fed with N-Nitrosodiethylamine N,N'-(Fluoren-2,7-ylene)bis-acetylamine

Shozo Takayama 11

Problems in the Pathological Evaluation of Malignancy

Tomizo Yoshida 21

Quantitative Analysis of Malignancy. Evaluation of Transplantability and Survival

Haruo Sato, Hiroshi Satoh, and Toshio Kuroki 29

Histopathology of Transplantable Hepatic Carcinomas induced by Chemical Carcinogens in Rats

Melvin D. Reuber 43

Studies on the Conversion of Morris Transplantable Hepatomas into Ascitic Form

Shigeyoshi Odashima and Harold P. Morris 55

Cytochemical and Electron Microscopic Examination of Morris 5123 and Reuber H-35 Hepatomas after Several Years of Transplantation

Alex B. Novikoff and Luis Biempica 65

Deviation in the Chromosomal Pattern of Ascites Hepatomas

Hidehiko Isaka 89

Biochemistry Session

Glycolysis, Respiration, and Enzyme Deletions in Slow-growing Hepatic Tumors

Sidney Weinhouse 99

Metabolism of Glycogen in Rat Ascites Hepatomas	
Shigeru Tsuiki and Ryosuke Saheki	117
Dedifferentiation of Sugar Metabolism in the Liver of Tumor-bearing Rat	
Masami Suda, Takehiko Tanaka, Fumiaki Sue, Yutaka Harano, and Hiroko Morimura	127
Molecular Species of Aldolases and Hexokinases in Experimental Hepatomas	
Takashi Sugimura, Taijiro Matsushima, Takashi Kawachi, Yukiko Hirata, and Sumie Kawabe	143
The Molecular Correlation Concept: Studies on the Metabolic Pattern of Hepatomas	
George Weber	151
A Preliminary Study on Nicotinamide Adenine Dinucleotide Biosynthesis in Morris Hepatoma	
Yasutomi Nishizuka and Osamu Hayaishi	179
Enzyme Patterns and Malignancy of Experimental Hepatomas	
Tetsuo Ono	189
Closing Remarks on Biological and Biochemical Evaluation of Malignancy in Tumors	
Waro Nakahara	207
