

Contents

Foreword	vii
Introduction	ix
 Aberrant differentiation in carcinogenesis	
Aberrant differentiation in mouse skin carcinogenesis <i>S. H. Yuspa, A. Kilkenny & D. R. Roop</i>	3
Unique features in differentiation of mast cells <i>Y. Kitamura, Y. Kanakura, A. Kuriu, J. Fujita & T. Nakano</i>	11
 Somatic cell genetics	
A brief review of the evidence for the genetic regulation of tumorigenic expression in somatic cell hybrids <i>E. J. Stanbridge</i>	23
Suppression of transformed phenotypes and c-myc expression in a mouse plasmacytoma line after cell fusion with normal fibroblasts <i>T. Oikawa, N. Kondoh, Y. Ogiso & N. Kuzumaki</i>	32
Intracellular factors involved in erythroid differentiation of mouse erythroleukaemia cells <i>T. Watanabe, S. Nomura, T. Kaneko, S. Yamagoe & M. Oishi</i>	43
 Cell-cell interaction and tumour promotion	
Role of intercellular communication in the control of critical gene expression during multistage carcinogenesis <i>H. Yamasaki, K. Enomoto, D. J. Fitzgerald, M. Mesnil, F. Katoh & M. Hollstein</i>	57
Cadherins: key molecules for selective cell-cell adhesion <i>M. Takeichi</i>	76
Activation, down-regulation and target proteins of protein kinase C in tumour promotion systems <i>in vitro</i> <i>T. Kuroki & K. Chida</i>	80

Molecular mechanisms of induction of transcription of β -actin gene by tumour promoters and serum factors	90
<i>T. Kakunaga, K. Makino, T. Kawamoto, H. Sugiyama, S. Orita and H. Niwa</i>	
Protein kinase C as both positive and negative regulator for proliferation of vascular smooth muscle cells	102
<i>Y. Kawahara, K. Kariya, Y. Fukumoto, H. Fukuzaki & Y. Takai</i>	
Oncogenes and cellular genes regulating differentiation and carcinogenesis	
Prenatal carcinogenesis: from pathology to molecular biology	121
<i>L. Tomatis</i>	
A novel transforming gene, <i>hst</i>	133
<i>M. Terada, H. Sakamoto, T. Yoshida, K. Miyagawa & T. Sugimura</i>	
Aberrations of growth and differentiation pathways during neoplastic transformation of human epithelial cells	139
<i>C. C. Harris, D. E. Brash, J. F. Lechner & G. Mark</i>	
Structure and function of the <i>erbB</i> gene family	149
<i>K. Toyoshima, T. Akiyama, S. Mori, S. Ishii, J. Yokota & T. Yamaoto</i>	
Cooperation between cellular and Epstein-Barr virus genes in the genesis of Burkitt's lymphoma	159
<i>A. Calender, M. Billaud & G. Lenoir</i>	
Cooperativity of viral oncogenes in avian leukaemia	165
<i>T. Graf, P. Kahn, A. Leutz, H. Beug & B. Vennström</i>	
<i>env</i> -Related glycoprotein gene of Friend spleen focus-forming virus: mutational analysis of its leukaemogenic function	171
<i>H. Amanuma & Y. Ikawa</i>	
Regulation of the interleukin-2 system and T cell neoplasm	181
<i>T. Taniguchi, G. Yamada, H. Shibuya, M. Maruyama, H. Harada, M. Hatakeyama & T. Fujita</i>	
A hypothesis for the function of proteins of the <i>myc</i> -family proteins	185
<i>Y. Taya</i>	
Structure and expression of the <i>ret</i> transforming gene	189
<i>M. Takahashi</i>	
Subject index	199
